Summary

Computer Science undergraduate specializing in backend engineering and AI-integrated systems, with a strong understanding in API design, scalable architecture, and RAG systems. I build backend and AI-driven systems that hold up under real conditions, applying practical engineering to solve real-world problems.

Education

Gokaraju Rangaraju Institute of Engineering and Technology

B.Tech in Computer Science Engineering, CGPA: 8.02

Sep 2023 – Jul 2027

Hyderabad, India

Deeksha Junior College

Class XII, MPC, Percentage: 90%

Aug 2021 – May 2023

Hyderabad, India

Vikas – The Concept School

Class X, Percentage: 79%

Jun 2017 – May 2021

Hyderabad, India

Core Coursework

Object-Oriented Programming, Data Structures and Algorithms, Operating Systems, Database Management Systems

Technical Skills

- **Languages & Frameworks:** C++, Java, Python, JavaScript, React.js, Node.js, Express.js, FastAPI, Spring Boot
- **AI & Databases:** LangChain, RAG Pipelines, FAISS, MongoDB, MySQL
- **Tools & Technologies:** REST APIs, JWT Authentication, Git, Postman, Docker, Prompt Engineering

Projects

Document Q&A System with Hybrid RAG Architecture

Nov 2025 – Feb 2026

- Solved unreliable, ungrounded RAG answers by building a hybrid dense+sparse retrieval pipeline (FAISS + BM25, RRF-fused) with MMR re-ranking for higher precision.
- Integrated Groq's llama-3.3-70b-versatile for hallucination-free, source-cited answers with conversational memory and token-streaming.
- Achieved 15% higher retrieval precision, processed 50+ page PDFs with OCR fallback, and sub-5s streamed response latency.
- **Tech Stack:** Python, LangChain, FAISS, BM25, HuggingFace

Wireless Intrusion Detection System with AI-Powered Threat Analysis

Mar 2026 – May 2026

- Developed the AI explainability module in a 4-member team project building a distributed 2-node Wireless IDS that detects Wi-Fi attacks in real time and replaces manual threat research with AI-generated context.
- Built the AI threat-analysis engine using Groq LLM (Llama-3.3-70B) to classify attacks, map to MITRE ATT&CK, generate defense recommendations, and power an interactive AI-analyst chat
- Detected and explained 3 wireless attack types (deauth flood, targeted deauth, long SSID) with AI threat analysis generated in under 5 seconds per alert
- **Tech Stack:** Python, JavaScript, React, Socket.IO, Kismet, Groq LLM

AI-Powered GitHub PR Review Dashboard

July 2026 – Present

- Solved slow, inconsistent manual PR reviews by building an AI-powered dashboard that automates GitHub PR analysis, fetching diffs and generating intelligent review feedback.
- Leveraged Groq Llama-3.3-70B to generate PR summaries, detect potential bugs, suggest code improvements, and identify security concerns.
- Optimized performance using MongoDB review caching (1 AI call per PR), 15K-character diff truncation, and support for 50 repositories / 50 pull requests per API request.
- **Tech Stack:** FastAPI, React, MongoDB, GitHub OAuth, Groq LLM

Position Of Responsibility

Event Committee Lead

Sep 2025 – Present

Computer Society of India (CSI) – GRIET

Student Leadership

- Led a 50+ members team as Event Committee Lead to plan and execute 4+ technical events (seminars, workshops, ideathon, hackathon) for 400+ participants at GRIET, achieving 100% on-time completion across all events.

Certifications & Achievements

- **AWS** — AWS Educate Introduction to Generative AI —  Verify
- **AWS** — AWS Academy Graduate - Cloud Foundations —  Verify
- **Top 10 Finalist** at TechXcelerate Hackathon (BITS Hyderabad) and VHack Hackathon (Vignan Institute)
- **Smart Interviews** — Smart Coder Global Rank (8476 / 56602)

July 2026

Dec 2023
